This adopted rate schedule is subject to a monthly Power Cost Adjustment (PCA) calculation. The PCA charge will be updated monthly based on the average power cost calculated over the previous 12 months. The PCA will be implemented on 11/1/2025 and calculated each month thereafter.

SPECIAL CONDITIONS

1. Basis for demand charge

The customer will be billed for demand according to the customer’s “maximum demand” each month. The number of KW used will be recorded over 15-minute intervals; the highest 15-minute average in the month will be the customer’s maximum demand.

2. Seasons

The summer rate is applicable from May 1 through October 31; the winter rate is applicable from November 1 through April 30. When billing includes use in both the summer and winter periods, demand and energy charges will be prorated based upon the number of days in each period.

3. Prior Service

Customers being served under this schedule prior to June 30, 1992 are not subject to the 25,000 KWh minimum requirements.

4. Miscellaneous

For customers who use service for only part of the year, this schedule is applicable only on an annual contract.
