

# LOMPOC FIRE DEPARTMENT

## BUSINESS INSPECTION APPLICATION

TO: Business Owner/Operator

The Fire Department welcomes your business to our community. The intent of the business inspection is to visit your business as it is set-up and operational so that the Fire Department can assist with minor items that may need adjustment for the safety of your customers and employees. It shall be the duty of the business owner or his/her authorized agent to notify the Fire Department **at least 48-hours prior** to a business inspection. In order to schedule an inspection, please call (805) 736-4513. As a reminder, no changes to the occupancy classification or layout involving walls, plumbing, electrical, or mechanical are allowed until a building permit is issued for the work. Print all fields **FIRMLY**.

**FIRE PREVENTION BUSINESS SELF-INSPECTION WORKSHEET**

The items contained on this sheet are the most common fire hazards found by Fire Department personnel when inspecting businesses. The following worksheet has been provided for your convenience in order to provide you with some of the items to be inspected by the Fire Department. It is suggested that you walk through your business with this form in hand prior to the Fire Department inspection. Any items found to be deficient should be corrected in a timely manner.

- Are you remodeling, renovating, altering, adding, changing use, or performing demolition work that may require building, electrical, mechanical, plumbing, or fire operational permits?
- Is your address visible from the street, on contrasting background, with numbers at least four inches in height?
- Is drive or alley around building/site kept clear for the fire apparatus use?
- Are all trash containers located at least five feet from building?
- Are large capacity waste containers kept in the closed position?
- Is the Fire Department emergency phone number (911) handy or near telephones?
- Are gas valves and/or electrical panels kept clear and identified to show which valves and switches affect which areas?
- Are all faceplates in place on electrical outlets and switches?
- Are multi-plug adapters in use in the building? If yes please remove them.
- Are extension cords used in place of permanent wiring? If yes please remove them.
- Is electrical wiring frayed, worn, or spliced? If yes have a qualified person correct.
- Have you cleaned and/or installed new filters in heating/air conditioning, or cooking exhaust systems?
- Are combustibles (paper, rags, etc.) stored at least four feet from gas appliances (water heater, furnace, cooking equipment etc.)?
- Are all piles of paper, debris, and trash etc., kept picked up in and around the building?
- Have all fire extinguishers mounted on wall (preferable near exits) so that top of extinguisher is not more than four feet above the floor?
- Are all fire extinguishers visible with proper signage and readily accessible for use?
- Remove double key dead bolts or similar devices from all exit doors. (Except main door with the sign: "THIS DOOR TO REMAIN UNLOCKED WHILE THE BUILDING IS OCCUPIED")
- Are all exits and paths to exits kept clear and are clearly marked with proper signage and lighting?
