REPORT BACKGROUND

mile radius around the point location selected. Only park acres within the project area's half mile radius are reported. Population and people in poverty are calculated by determining the percent of any census block-groups that intersect with the project area. The project area is then assigned the sum of all the census block-group portions. An equal distribution in census block-groups is assumed. Rural areas are calculated at a census block level to improve results.

The project statistics have been calculated based on half

Median household and per capita income are calculated as a weighted average of the census block- group values that fall within the project area. More information on the calculations is available on the methods page »

Demographics—American Community Survey (ACS) 5-year estimates 2014-2018; Decennial 2010 Census; the margin of error (MOE) was not analyzed.

Parks—California Protected Areas Database 2020a CFF adjusted (6/2020) - more information at http://www.CALands.org. Parks and park acres area based on best available source information but may not always contain exact boundaries or all parks in specific locations.
