

Storm Water Pollution Prevention Plan (SWPPP)

Do I need a Storm Water Pollution Prevention Plan (SWPPP) for my project?

- Is the site plus all disturbed area (including staging area) an acre in size or more? If your answer is yes, a SWPPP is required.
- A SWPPP must be prepared by a CA qualified SWPPP Developer (QSD) and overseen by a qualified SWPPP Practitioner (QSP).
- Reference and fill out the Construction SWPPP Checklist, identifying the page where each requirement is found in the SWPPP. The checklist can be found at: <https://www.cityoflompop.com/government/departments/economic-community-development/planning-division/environmental-documents/construction-storm-water-pollution-prevention-plans>
- SWPPPs should be submitted to the Building Division with three copies, in three-ring binders, with tabs and the full size SWPPP site plan in a sleeve holder.
- A Notice of Intent (NOI) must be filed with the State Water Resources Control Board, along with the appropriate fee, and the finalized SWPPP uploaded into SMARTS database located at: <https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.xhtml>
- Once complete, a WDID Number will be issued for inclusion in the SWPPP.
- Once the SWPPP is verified to be complete, an approved site copy and engineer's copy will be returned.
- Before any earth disturbing work is begun, all Best Management Practices (BMPs) must be properly installed and inspected by the City's QSP. You can reach the City's QSP at (805) 875-8244. Please allow for a minimum of two days' notice when calling for an inspection.
- Provide the City Planning Division with copies of all Rain Event Action Plans (REAPs), inspection forms, and any updates to information within two weeks of their preparation.
